SUMMARY

Senior Systems Administrator with over 13 years of experience driving multi-cloud modernization, identity security, and enterprise infrastructure across defense and commercial sectors. I specialize in replacing legacy hybrid setups with scalable cloud environments (Azure, GCP, AWS) while writing custom automation tools to streamline identity management and compliance workflows. My technical edge lies in combining deep system administration expertise with full-stack development skills to engineer self-sustaining, secure IT environments.

TECHNICAL SKILLS

Cloud & Infrastructure: Azure, GCP, AWS, Hybrid Cloud Migration, Microsoft Entra ID (Azure AD), Active Directory, Group Policy (GPO), Okta SSO, VMware, vCenter, VirtualBox, Windows Server, Linux, macOS, Solaris

System Management & Security: Jamf Pro, Microsoft Intune, MoveIT Transfer/Automation, Exchange, Barracuda, Kaseya, McAfee, ACAS, Q-TIP, FlyingSquirrel, SecurityCenter, Splunk, PRTG, Penetration Testing, SOC2, HIPAA, PCI-DSS, PII

Networking: Cisco (Call Manager, Meraki), Juniper, TACLANE, Routers & Switches, DNS/DHCP/ARP, TCP/UDP/IP, OSPF, EIGRP, RIP, Wireshark, VPN, Network Security

Automation & Software Development: PowerShell, C#, VB.NET, JavaScript, Java, Node.js, React.js, Express.js, jQuery, Bootstrap, HTML5/CSS3, SQL (MySQL), MongoDB, Git

EXPERIENCE

Senior Systems Administrator | Beazley Security | Remote Feb 2023 – Present

- Architected and executed a complete migration from a hybrid cloud environment to a fully native cloud architecture across Azure, GCP, and AWS.
- Streamlined endpoint management by deploying Jamf for macOS and Microsoft Intune for iOS and Windows devices company-wide.
- Standardized security posture by provisioning multiple enterprise Azure tenants aligned strictly with Microsoft security baselines and Entra ID access controls.
- Automated administrative workflows, building a custom Slack helpdesk ticketing pipeline and establishing a standardized onboarding SOP.

- Managed and maintained MoveIT Transfer & Automation SFTP infrastructure to support secure, compliant customer-facing data exchanges.

Senior Systems Administrator | Ophelia | Remote Sept 2022 – Feb 2023

- Managed nationwide IT infrastructure, cloud services (GCP), and end-to-end security compliance for a remote-first organization.
- Enforced identity protection and streamlined user access by deploying Okta SSO, Halp helpdesk routing, and dual-MDM controls (Jamf and Intune).
- Maintained continuous compliance across HIPAA, PCI, PII, and SOC2 frameworks through rigid policy creation and routine infrastructure audits.
- Partnered with executive leadership and Finance to manage the annual IT budget, negotiate vendor contracts, and reduce operational procurement costs.

Member of Technical Staff | OxeFit | Plano, TX Jul 2021 – Sept 2022

- Managed IT infrastructure across three offices spanning systems administration, networking, security, compliance, and help desk operations.
- Built the company's Azure cloud-first server infrastructure and deployed UniFi networking across all three offices.
- Implemented Jamf and Microsoft Intune endpoint management, Spiceworks help desk, and standardized onboarding/offboarding processes.
- Partnered with Finance on IT budgets and expense reporting, managed third-party vendors, and developed company IT policies and procedures.

Systems Administrator | Fundbox | Dallas, TX Jun 2019 – June 2021

- Maintained, monitored, and optimized US-based IT infrastructure and operations while collaborating daily with international technical teams.
- Built standardized provisioning and hardware setup workflows across Apple and Windows fleets, improving overall onboarding turnaround time.
- Oversaw asset management, software licensing, and hardware life cycles to keep endpoint operations compliant with security standards.

Systems Administrator | Helion Technologies | Dallas, TX Nov 2018 – Jun 2019

- Served as the top escalation tier for the Service Desk, resolving advanced infrastructure issues and mentoring Desktop Support staff.
- Administered Active Directory, DFS, DHCP, DNS, Exchange, Office 365, file permissions, GPO, Barracuda, PRTG, Kaseya, Windows Server, VMware, and Cisco Meraki environments.

- Coordinated critical incidents with vendors, DMS providers, and ISPs while providing technical action plans to Account Executives.

Information Technology Specialist | The Scion Group | Dallas, TX Dec 2017 – Nov 2018

- Provided Tier 1 and Tier 2 infrastructure, network, and server administration for a mid-sized Windows Server domain environment.
- Built a custom C# / SQL / PowerShell desktop application that automated Active Directory and Office 365 account provisioning, logging user creation directly into a central database.
- Maintained internal web-based inventory systems using JavaScript, Node.js, HTML/CSS, and SQL.

Technical Support Advisor (contract) **| Conduent** | Dallas, TX Sept 2017 – Dec 2017

- Provided remote technical support for iMac, MacBook, iPhone, iPad, iPod Touch, and Windows systems using phone-based troubleshooting and screen-sharing tools including Bomgar and SafeView.

Systems Administrator (contract) **| Link Solutions, Inc** | Dallas, TX Mar 2017 – Sept 2017

- Conducted patch management, vulnerability assessments, and compliance audits for Cyber Security/Information Assurance on NIPR and SIPR networks.
- Ran wireless security scans using FlyingSquirrel and performed vulnerability assessments using ACAS and Q-TIP.
- Managed daily Active Directory user rights, DHCP servers, and on-site physical security requirements for specialized divisions.

PC Technician (contract) **| AllStaff Technical Solutions** | Dallas, TX Jul 2016 – Mar 2017

- Handled hardware installation, equipment repair, network configuration, and break/fix support for Mac and Windows environments.
- Configured enterprise antivirus solutions (McAfee) and handled IMAC deployments across legacy and modern Windows platforms.

Network Engineer | U.S. Army | Fort Hood, TX Jul 2013 – Jun 2016

- Engineered, configured, and maintained Cisco network infrastructure, including enterprise routers and switches, supporting secure military communications environments.

- Administered Cisco Unified Communications Manager and VoIP infrastructure, including configuration, deployment, troubleshooting, and ongoing maintenance of IP telephony systems.
- Configured and troubleshot Layer 2/3 networking, including VLANs, routing, switching, and TCP/IP connectivity across tactical and fixed-station environments.
- Delivered end-user administration, systems analysis, and software maintenance while adhering to strict operational security protocols.

EDUCATION

Full Stack Web Development Certificate | **Southern Methodist University** | Dallas, TX

- Focused on JavaScript, Node.js, Express, React, MySQL, MongoDB, and Git version control.
